

DOORS AND VENEERED SOLUTIONS FOR EDUCATIONAL INSTITUTIONS

Eggers Industries

Eggers Industries provides custom design and construction solutions for educational institutions. From university libraries to lecture halls and state-of-the-art laboratories, we provide quality products to create environments that encourage creativity, inspire ideas and promote learning. Whether it's a sequence matched veneered hallway, a soundproof door for a music room or a 40-seat conference top for faculty meetings, Eggers' meticulously crafted products surpass the highest industry standards.

Turning nature's beauty into works of art

Stile & Rail Doors and Frames

Eggers' stile & rail doors offer the ultimate in terms of aesthetics and performance. We can custom manufacture stile & rail doors to exact specifications. We are especially experienced with feature area work as well as historical restoration on older campuses and buildings.

Acoustical Doors

Our acoustical doors provide superior sound control for a variety of uses: vocal rooms, band rooms, gymnasiums, audio-visual labs, performance halls and theaters. They allow students to practice music, rehearse plays, discuss and debate issues at full volume and potential. Eggers' doors have the highest STC ratings in the industry – STC 40 for true stile & rail doors and STC 51 for flush doors.

Bullet-Resistant Doors

At Eggers Industries, we fully understand and appreciate that the safety and well-being of your students and staff is your top priority. Bullet-resistant doors are a major step toward enhancing safety. Our doors are designed to protect life and property from direct arm fire.

- Available in resistance levels 1-8, per UL 752.
- The fiberglass core material meets the bullet resistance requirements of test standard UL 752.

Fire-Rated Doors and Frames

Eggers' fire-rated doors offer unbeatable functionality and visual appeal. Our flush doors, true stile & rail doors and veneered door frames are fire-rated up to 90-minute. Solid lumber frames are rated up to 45-minute. True-divided lite doors have 20-minute ratings while full-lite doors are 20- and 45-minute rated.

Solid Lumber Edges

All Eggers doors are available with solid lumber edges. Unlike veneer over SCL, Eggers' solid lumber edges provide the extra heavy-duty durability required by busy educational institutions. Eggers doors are built to withstand the most rigorous use on a daily basis.

eiDoors for High Impact Applications

Pair the strength and protection of InPro Corporation's Rigid Sheet and the quality and performance of Eggers Doors to make eiDoors - supremely durable doors that withstand high amounts of traffic and abuse while maintaining an attractive decor. Now, eiDoors are available with replaceable edges on both the hinge and lock edges for convenient, on-site replacement - offering a convenient, high quality, and cost effective solution for maximum protection against door damage.

Stile & Rail Doors, Door Frames, Plywood, Veneered Components

Components

Reception desks, ceiling panels, media shelves and bookcase panels are just some examples of components we craft. Our finely matched components lend warmth and visual appeal to function.

Conference, Lecture Hall and Table Tops

From libraries to lecture halls, study rooms to laboratories, we can custom produce tabletops to any size or shape.

- Single pieces up to 76" wide x 92" long.
- Multiple pieces can be sequenced and end-matched for larger sizes.
- Inlays and multi-specie assembly.

Architectural Paneling

Our architectural wall panels are custom fabricated from the widest selection of hardwood face veneers. Special applications include:

- Reveals and inlays for featured areas.
- Acoustical, perforated, curved, flat, shaped and oversized panels.
- Running, sequence and blueprint matching.

Mini-Blind Units

Eggers offers mini-blind glass units with adjustable levels of privacy. Available with tilting and raising options, the blinds are ideal for use in classrooms, administration rooms and offices. The 1" blinds are encapsulated between two sheets of 1/8" tempered glass for easier cleaning and maintenance.

Environmental Capabilities

A SmartWood Chain of Custody supplier, we offer products certified by the Forest Stewardship Council (FSC). We are able to help you earn points toward LEED™ certification with Agrifiber and Particleboard core constructions, and FSC-certified lumber, cores and veneers. We also employ environmentally-friendly UV finishes that are free of Volatile Organic Compounds (VOC), with no added urea-formaldehyde.
