

Stone-Veneer® Care and Maintenance Instructions

Stone-Veneer® is a real and natural slate product; therefore, it is as porous as any natural slate would be. The following precautions should be followed with Stone-Veneer® products:

- **Care:** Although Eggers does not promote the use of Stone-Veneer® in wet areas, you may desire to seal this product. This will help to prevent bacteria and everyday dirt and stains from accumulating in the slate's pores and making it difficult to clean. The natural minerals present in water can also accumulate in the stone's pores.

Tec™ EnsealantSB, a solvent based stone enhancer and sealer, has been tested with good results on Stone-Veneer®. More information can be found at www.tecspecialty.com

- **Cleaning:** Any impurities that are splashed or spilled on Stone-Veneer® should be removed as soon as possible with warm water and a slightly moistened cloth. If the stain is not easily removed, it is recommended that the surface be washed with a soft cloth moistened with a mild dish washing liquid and warm water solution. Any other cleaners have not been tested and should first be tested on an inconspicuous area to confirm that they will not adversely harm or stain the surface of the Stone-Veneer®.
